Which of the following connectors is used for musical equipment? Stores power O C. D 36. Cable Internet Quick Answer: 76 B. Exam SY0-401 | IT Security ExamCollection Verified - Instant Download. A receptacle tester and multimeter can be used (with caution) to test an AC outlet. All the rest of the examples are technologies that are, or use, a baseband connection (one channel on the media). AGP O D. MAC filtering maintains a list of MAC addresses that are allowed to access a network, but once again, this is a different concept from DHCP. To find out if someone attempted to get into the computer itself, turn on the chassis intrusion alert in the BIOS. Turn the sheet over. O D. 192.169.0.1 is public because of the second octet: 169. Remember this doesn't count the SCSI card. Soper, et al (ISBN: 978-0789749802) 3 CHAPTER THREE 220-801 Practice Exam B Now let's kick it up a notch. These have operating systems that are embedded in flash memory, and the rest of the information they require comes from a server. 73. The MPEG Audio Layer III (.MP3) works best when dealing with multiple platforms. 166 Quick-Check Answer Key . However, you might upgrade, replace, or add to RAM. A dual-core processor requires more RAM to function than a single-core processor. POTS line O C. O O B. Please note that I cannot help you with technical problems related to the topic of this book. SCSI is a parallel port used by hard drives and tape drives. ISA Detailed Answer: 69 50 Chapter 3 ✓ Quick Check 33. Peripheral Component Interconnect (PCI) is an expansion bus that accepts network adapter cards, sound cards, and so on. Which type of printer uses a print head, ribbon, and tractor feed? 128 Chapter 7: 220-802 Practice Exam A. There are optical hard drives, but they are rare; optical drives are commonly implemented as CD, DVD, or Blu-ray drives. A 13. However, if you have not acquired that experience, I recommend that you register for a hands-on A+ course or, at the very least, purchase an authorized A+ study guide such as the A+ Exam Cram or the more in-depth A+ Cert Guide. If a printer has this, then it is a multifunction printer acting as a fax machine. D 15. Thick client 94. The complementary metal-oxide semiconductor (CMOS) is a chip that is soldered onto the mother board that works in conjunction with the Basic Input/Output System, another chip soldered on to the motherboard. It could also be caused by overclocking. Here you can download free practice tests for such certifications as MCSA, MCSE, MCDBA, MCSD, A+, Network+, Security+, CCNA, CCNP, IBM, HP, VMware and so... The fuser being fragile O D. 802.11n Quick Answer: 63 32. Screwdriver 20. A printer pool is a group of printers (often identical) that share the duties of printing. Which of the following is a typical speed of a SATA hard drive? If you just completed the first exam, give yourself a half-hour or so before you begin this one. 802.11a Ouick Answer: 72 O B. Dynamic Random Access Memory (DRAM) is the modules (or sticks) of memory that you can install into a motherboard. Certifications are highly-valued credentials that qualify you for jobs, increased compensation and promotion. 17. D 68. microATX is a motherboard form factor commonly used in smaller PCs and HTPCs. RG-6 is the connector used for cable TV and cable Internet connections. Turning the printer off might not be enough. The CPU is the least likely to be replaced. Port 25 Quick Answer: 63 Detailed Answer: 68 B. 86. 169.254.10.10 O D. It is commonly sold as PC2-6400. MIDI HDMI DVI DisplayPort Quick Answer: 66 46 Chapter 3 ✓ Quick Check 12. Take the customer out for a cup of coffee. 5 or email Connect with us: Introduction Welcome to CompTIA A+ 220-801 and 220-802 Practice Questions Exam Cram. 102 Answers and Explanations . Receptacle tester O D. The Musical Instrument Digital Interface (MIDI) connector is used for musical equipment such as keyboards, synthesizers, and sequencers. Answers: A, B, and D. What does a vellow exclamation point next to a device in the Device Manager indicate? Which of the following is user-replaceable memory in a PC? Even if you have answered a question incorrectly, do not be discouraged. Laser Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 63 Detailed Answer: 64 B. 15. Act as if you never saw the list. 32-bit operating systems can run older 16-bit programs, but 64-bit operating systems will have problems running 16-bit programs even in compatibility mode. Do not stick a vacuum cleaner inside a computer; it could damage the course and/or read the study guide (or guides), return to this book as your late-stage test preparation to be used just before taking the real exams. The northbridge takes care of the connections between the CPU and the PCI Express (PCIe) x16 expansion slot. We do have a User Services group, however, where I will forward specific technical questions related to the book. 1000 Mbps is a common network data transfer rate. Write down your answers and check them against the answer key that immediately follows the exam. 1 Chapter 1: Introduction to the 220-801 Exam. It is also used to program devices such as handheld terminals. You should first ask if anything has changed since the optical drive worked properly. 56. While you are working on a computer at a customer's home, the customer informs you that he needs to leave for about 10 minutes and that his 8-year-old son can help you with anything if you need it. Class 2 devices are the most common (for example, Bluetooth headsets). 256-bit O D. Which type of cable would you use to connect a laptop directly to a PC? 15-pin power cable 90. The customer should be referred to your supervisor only if the person gets in the way of you doing your work. DDR3-800 has a peak transfer rate of 6,400 MB/s; it is also known as PC3-6400. It doesn't deal with routing, or broadcasts; instead it prevents intrusion to a network. IEEE 1284 B. I Domain 4.0: Troubleshooting (36%). However, your co-worker might need an adapter, too; otherwise, the plug may not fit. However, the switch does not segment by IP address—it communicates with computers and segments the network, via MAC addresses. DDR2-1600 OC. 1000 bits per second OC. You cannot install drivers to the BIOS. Cable Internet is a broadband connection. 59. 22 Domain 5.0: Operational Procedures. 57. Wavering Detailed Answer: 73 Decisive Positive Certain 59. DLT Quick Answer: 74 Decisive Positive Certain 59. DLT Quick Answer: 74 Decisive Positive Certain 59. DLT Quick Answer: 75 Decisive Positive Certain 59. DLT Quick Answer: 75 Decisive Positive Certain 59. DLT Quick Answer: 76 Decisive Positive Certain 59. DLT Quick Answer: 76 Decisive Positive Certain 59. DLT Quick Answer: 77 220-801 Practice Exam B 61 🗸 Quick Check 91. Over the past decade he has also taught CompTIA A+, Network+, and Security+ certification courses, both in the classroom and via the Internet. Mouse C. The BIOS resides on a ROM chip, more specifically an electrically erasable programmable ROM (EEPROM) chip. For more information, please contact U.S. Corporate and Government Sales 1-800-382-3419 For sales outside of the U.S., please contact International Sales Managing Editor Sandra Schroeder Project Editor Mandie Frank Proofreader Leslie Joseph Technical Editor Aubrey Adams Editorial Assistant Vanessa Evans Media Producer Tim Warner Interior Designer Gary Adair Cover Designer Gary 4 GB of RAM \bigcirc D. An IEEE 1394 (FireWire) chain can have up to 63 devices. CompTIA recommends multiple learning tools to help increase coverage of the learning tools t might have already failed. Ethernet C. B 74. It is not your responsibility to watch over children, nor should any company agree to have its consultants do this. You should also touch the chassis of the computer before handling any components. 448-bit memory bus width is used by some video cards. Don't blame the user by asking what "you" modified; it implies that you think the user caused the issue. 10. CD-ROM drives use removable discs; however, the maximum they can store is much greater. You want to upgrade memory in your computer. C 39. 169.255.10.41 is not private either. printer's buffer with the spooler that exists on the hard drive of 78 Chapter 3 the computer that controls the printer. Recommending a training class is tantamount to dismissing the customer off-hand. A 33. I am available for questions at my website: www.davidlprowse.com I answer questions Monday through Friday, usually in the mornings. The paper tray simply holds the paper. Which printer technology should you select? 15 O D. Quick-Check Answer Key: After you have finished answering the questions, you can quickly grade your exam from this section. Take the Test! Select a certification exam provider and schedule a time to take your exam. What action should you take? IEEE 1394 is the PC equivalent of FireWire. Inkjet printers use a print head but use an ink cartridge instead of a ribbon and don't use a tractor feed. As a consultant, he installs and secures the latest in computer and networking technology. BIOS O C. Your co-worker's laptop display doesn't come on. You can find exam providers at the following link: testprep/testingcenters.aspx x Join the Professional Community Join IT Pro Community The free IT Pro online community provides valuable content to students and professionals. However, before working at a customer site, you should ask that all confidential materials be removed before you begin work. It isn't your call to make. 61. Cat 6 B. 192.168.0.10 O C. The fuser being hot B. The detailed answers to every question will aid in reinforcing your knowledge about the concepts associated with the 2012 version of the CompTIA A+ exams. O Quick Answer: 63 Detailed Answer: 63 A. Router 49. • Global Recognition—CompTIA is recognized globally as the leading IT non-profit trade association and has enormous credibility. Which of the following types of printers uses toner? Port 443 26. Download Exam SY0-401 PDF files free. If the device is disabled, it will have either a down arrow (for Windows XP). 301 Getting Ready and the Exam Preparation Checklist . Exam N10-006| CompTIA Network+ Certification ExamCollection Verified - Instant Download. The driver is not digitally signed. Client/server is a type of networking organizational technique. Move the co-worker farther down the hall. 72° Celsius 62. C 76. Wait at least 15 minutes before opening the printer to see what caused the smoke. 255.10.15.7 is not valid.

11.58.254.169 is not private because it is on the Class A 11 network. Which of the following is an example of a broadband connection? What is the PC equivalent of FireWire? SSD stands for solid-state drive. C 28. Which of the following capabilities enables a printer to store multiple documents? MAC address O C. B 18. Serial Quick Answer: 63. Detailed Answer: 75 B. B 44. C 37. On memory Quick Answer: 63 Detailed Answer: 66 C. Fiber-optic cable has a single glass or plastic core that sends light. There is no actual 802.11x standard; it was not used in order to avoid confusion. Virtualization workstation O C. Answer: D. Answe 64 Detailed Answer: 77 A. I'll be mixing in some more difficult questions this time. The acronym RTM should be kept within technical circles! 97. These can be configured within technical circles! 97. These can be configured within technical circles! 97. other words of wisdom you're willing to pass our way. Power cord 70. 35. 400 Mbps O C. Raise the humidity. The 8P8C is the technically correct name for an RJ45 networking plug. Print driver C. You are working on a very old printer, and it starts to smoke. Intrusion detection systems (IDSs) and intrusion prevention systems (IPSs) can also do this but in a more intelligent manner. What is the most important piece of information needed to connect to a specific wireless network? CF C. "Did you log in with your administrator account?" O C. 187 Answers and Explanations . O O Quick Answer: 63 Detailed Answer: 63 Detai ratio defined as? Working in a carpeted area will also increase the components. If you have a maintenance contract, you could call the maintenance company to fix the problem. A parallel cable might be used to connect an older printer to a computer or an external hard drive to a SCSI 220-801 Practice Exam B 75 card. Again, remember to put the solution on a lint-free cloth first. The external power supply of the laptop converts AC to DC for the system to use and for charging the battery. Determines the best route to transmit data C. Download Exam PK0-003 PDF files free. Why CompTIA? B 2. Spray the cleaner directly on the monitor screen. Regular UTP cable such as Cat 5e or Cat 6 will be very susceptible. If you didn't score 90% or higher on Exam A, go back and study; then retake Exam A until you pass with 90% or higher. You are setting up a SOHO network with DSL. IEEE 802.3 84. SCSI O C. This will give you more ports than the computer already has for use with peripherals. When working on a computer, which of the following should you disconnect to prevent electrical shock? Cordless drill B. Line filter B. Depending on the path you choose to take, CompTIA certifications help you build upon your skills and knowledge, supporting learning throughout your entire career. 15 C. Multi-mode fiber-optic cable can send data about 600 meters. Always ask if anything has changed first before any other questions. O O O Quick Answer: 63 Detailed Answer: 66 A. 220-801 Practice Exam B 67 16. Windows Quick Answer: 63 Detailed Answer: 65 220-801 Practice Exam B 45 < Quick Check 6. What is the maximum distance at which a Class 2 Bluetooth device can receive signals from a Bluetooth device can rece recommended. Laser printers are much more complex and use more parts. Which of the following indicates that a printer is network-ready? C 62. You need to replace and upgrade the memory card in a smartphone. Which of the following indicates that a printer is network-ready? C 62. You need to replace and upgrade the memory card in a smartphone. Answers: A and E. 14. It is also accomplished by a UPS, though you probably wouldn't lug one of those around with your laptop while traveling is a valid IPv4 address for a network host? Refer the customer to your supervisor. ISA is the Industry Standard Architecture, a legacy 16-bit adapter card slot. 62. Port 443 is the default port for Hypertext Transfer Protocol Secure (HTTPS). A coaxial splitter is used to split the signal coming from a cable TV company, so that multiple TVs can be used at the same time. 1 gigabit per second 83. Dual channel memory combines two sticks of RAM into a bank that is 128-bit. Download Exam 220-802 PDF files free. Who This Book Is For The CompTIA A+ exams are designed for individuals with at least 12 months of hands-on experience in the lab or field. SRAM O E. It makes use of Port 110. D 95. This course tests your knowledge of CV0-001: CompTIA Cloud+ Certification. Spyware is installed into the browser. A wireless access point (WAP) connects the computers on the wireless LAN (WLAN). A computer you are working on has a lot of dust inside it. 18. The external modem is what connects to the COM1 serial port. Recommend a training class. How to obtain more information Visit CompTIA online: www.comptia.org to learn more about getting CompTIA online: www.comptia.org to learn more information Visit CompTIA online: www.comptia.org to learn more about getting CompTIA online: www.comptia.org to certified. No patent liability is assumed with respect to the use of the information contained herein. Coaxial slightly less, and shielded twisted pair (UTP) has four pairs, eight wires total. The more humidity there is, the less friction, and ultimately, less ESD. 121 Review What You Know . You'll hear more about him later. 7-pin data cable B. If the wrong voltage is running to the CPU, the system won't even boot. The other three connectors. 50. • More than 850,000—Individuals worldwide are CompTIA A+ certified. IEEE 1394b cable O D. If the power supply doesn't have one of those red switches, check the documentation to see if it can switch the voltage automatically. Spray on a lint-free cloth first, and then wipe the display gently. Compressed air is safe. Which bus slot provides the highest video performance? 11. This second 220-801 exam could be considered an intermediate practice test. The complementary metaloxide semiconductor (CMOS) stores information such as time and date and BIOS passwords. On which type of computer is RAM the most important? TV tuner card 86. 3.1 GHz C. Tell the customer that the child must be removed. Overclocking is not recommended, but if you do configure it, you should set temperature thresholds. Remember to always disconnect any power, data, or telecommunications cables before working on the system. Upgrade the cache on the drive to improve performance. A, B, and D 22. 122 More Test-Taking Tips . Port 143 is the Internet Message Access Protocol (IMAP); it's similar to POP3 but offers offline operation, and multiple clients can access the same mailbox. Inkjet O D. Computer won't boot. Stay calm and do the job as efficiently as possible. A 5. Quick Answer: 64 Detailed Answer: 77 O D. Which device can store a maximum of 1.44 MB on a removable disk? Power supply C. 123 Taking the Real Exam . PATA (IDE) hard drives use a 40-pin data cable and 4-pin (Molex) power cable. USB mouse O D. Power tools and battery-operated tools such as cordless drills should be avoided. Port 143 O D. O Detailed Answer: 71 8-pin 7-pin Molex 15-pin E. A 26. 127.0.0.1 Quick Answer: 71 169.254.0.0/16 172.17.58.254 255.10.15.7 52. D 29. 152 Domain 2.0: Security . However, you might want to do this outside and vacuum up the left over residue. It is known as the power adapter, and it needs to run at a very specific voltage. Here you can download free practice tests SY0-401: CompTIA Security+ Certification Exam. Free dumps for SY0-401: Certification Exam. Free dumps for S 63 Detailed Answer: 72 A. If a lot of data is flowing through a network card, what should the activity light look like? It is also known as PC3-12800. Most antistatic straps come with a 1 mega ohm resistor, which can protect against surges. With a background in telecommunications, qualifications in communications engineering and management, and graduate diplomas in computing and education, he teaches across a range of computer systems and networking vocational education and training areas. Overpowering O D. Be ready to give a detailed account of exactly what happened. Port 25 is the default port for SMTP. As you are servicing a manager's PC at your company, you run across a list of names of employees who are supposedly about to be let go from the company. This is because it is well known and has a low cost per MB of storage space. This is because it does not use copper wire or electricity, but instead uses glass or plastic fibers and light. the serial port as COM1 or COM2. C 80. Some power supplies have selectors for the United States and Europe (115 and 230 volts). USB can handle up to 127 devices, though both of these numbers are outside the realm of normalcy for most individuals! 15 is the maximum amount of devices that can be on a SCSI chain. Spooling Quick Answer: 64 Detailed Answer: 77 62 Chapter 3 ✓ Quick Check 96. A and E 49. An example of an impact printer is the dot matrix. On a laptop, which of the following would most likely be a pointing device? 60° Celsius is a typical operating temperature for CPUs such as the Core i5 or Phenom II. 1000 Mbps is 1000 megabits per second, otherwise notated as 1,000,000,000 bits per second, or 1 gigabit per second. Coaxial has a single core of copper. COM1 C. A USB connector C. Laser printers can print to special multipart forms, but not ones with carbon backing. A 31. USB is the newest type of mouse connection. Any copper cable will be susceptible to EMI to a certain degree. This is part of a router's job when connecting two or more networks. The information provided is on an "as is" basis. 172.17.58.254 is 72 Chapter 3 a Class B private IP address for a network host. This means don't open power supplies or CRT monitors, and don't touch capacitors on any circuit boards such as motherboards. They are used to exhaust heat out of the case. For better results when testing network cables, use a proper network cable testing kit. 301 Tips for Taking the Real Exam. PS/2 mouse C. 85. BTX O D. What should you be careful
of when removing the fuser? USB is the standard port for a printer. If a driver was not digitally signed, the device might show up in the Unknown devices category until it is installed properly. 80mm and 120mm are common sizes for what type of PC component? 127.0.0.1 is the local loopback address. If the person insists on leaving, and you can pack up your things before he goes, do so, and then call your supervisor to inform her of the event. Quick Answer: 63 Detailed Answer: 67 B. Use compressed air to remove the dust. Class 2 Bluetooth devices have a maximum range of approximately 10 meters. No explanations are offered yet. "Have you been to any inappropriate websites?" Quick Answer: 63 30. D 50. In addition, the purported list might be real, but it might not be. ROM 54. 37. Which of the following best describes a hub? AMR stands for Audio-Modem Riser, a small expansion slot developed by Intel to be used with sound cards and modems. Serial devices (and the port in general) are found less and less often on laptops. Impact O B. D 85. 5 Getting Ready for the Practice Tests . Finally, the CPU doesn't use a driver; instead the BIOS recognizes it (or doesn't, if it needs a BIOS update) and passes that information to the operating system. To prevent an attacker from opening the case, use a case lock. Thermal printers use a print head and a special heating element. Berg 51. 35 42. Then apply an administrative (also known as supervisory) password. IPv6 is not necessarily supported by all routers. A hub broadcasts data to all network devices connected to it. Another option would be to purchase a USB hub. Broadcasts data to specific network devices 65. Download free practice tests for such certifications as MCSA, MCSE, MCDBA, MCSD, A+, Network+, Security+, CCNA following is the default port for HTTPS? 44 Quick-Check Answer Key . Paper-feed errors are often caused by the pickup rollers, which are in charge of feeding the paper into the printer. 44. 126 Domain 3.0 Mobile Devices (a) . 42. 172.31.1.1 is the only address listed that is private. synchronize to. LPT1 is an older parallel printing port. As an associate publisher for Pearson IT Certification, I welcome your comments. Only correct answers are given in this section. A 43. Gaming PC Quick Answer: 68 O B. (Select the two best answers.) O O A. Static RAM (SRAM) is memory that is nonvolatile (as opposed to DRAM); it is also soldered to the circuit board. The floppy disk drive (FDD) stores a maximum of 1.44 MB on a removable disk (1.38 MB of which is actual data). Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 72 O D. Compare this to the closest competitor listed: AGP, which can do 2,133 MB/s, about 1/8 of PCIe. SCSI is used for hard drives and scanners among other things, but not for video. Career IT Job Resources Where to start in IT • Career Assessments • Salary Trends • US Job Board Forums on Networking, Security, Computing and Cutting Edge Technologies Access to blogs written by Industry resource links and articles related to IT and IT careers Content Seal of Quality This courseware bears the seal of CompTIA Approved Quality Content. 5 Domain 5.0: Operational Procedures (11%). Now, if you were opening the computer, you would disconnect everything. It is not a valid host IP address because it ends in 0.0. The first IP address of a network is always reserved for the network number; it can not be used by a host. B 81. Call 911. Impact refers to a type of private addresses: 172.16.1.1-172.31.255.255. The supervisor (or system) password is used so that only the technician can get into the BIOS (CMOS). Receives inbound e-mail on port 110 \bigcirc B. If DSL is installed in a SOHO (small office), devices such as telephones, fax machines, and security alarms should have line filters. Memory modules don't use fans, but they can be equipped (or purchased) with heat sinks of their own. What You Will Find ir This Book In every chapter devoted to practice exams, you will find the following three elements: . 8 GB O D. B 69. 68. The VGA connector uses a D shell (also referred to as D-sub) 15-pin connector. The only statement that is correct concerning IPv6 is that it uses 128-bit addressing. C 3. O O O Quick Answer: 64 Detailed Answer: 78 A. Also, the switch will normally use one type of media: twisted pair, connecting to RJ45 ports. A and D 94. It runs at an I/O bus clock speed of 800 MHz and can send 1600 megatransfers per second (MT/s). However, they are far more expensive than the traditional drive, which slows their general acceptance. CD-ROM O C. Fiber-optic cable is the only answer listed that is not affected by electromagnetic interference (EMI). Some routers still only support IPv4. Dual-Layer DVD O C. Answers: A and B. However, you might be fixing something that doesn't require you to open the computer—for example, connecting a network cable. For example, you might be fixing something that doesn't require you to open the computer—for example, connecting a network cable. router connects to the Internet via a fiber-optic connection. To connect one computer to another directly by way of network adapter cards, use a crossover cable. Which uses 32-bit addresses? This is compared to IPv4, which uses 32-bit addresses? This is compared to IPv4, which uses 32-bit addresses? multimeters can be used for that as well. 43. And, of course, stay away from any other electrical devices when working on computers. The impact printer technology is what you want. Think like a robot with the single purpose of fixing the problem, but act like a professional and courteous human being! 30. Coaxial 41. It contains a simulated testing the problem, but act like a professional and courteous human being! environment where you can take all seven exams on the computer in study mode or in full practice test mode. 68 Chapter 3 23. 21. • Career Pathway—CompTIA A+ is a building block for other CompTIA certifications such as Network+, Security+ and vendor specific technologies. Answers and Explanations: This section provides you with correct answers as well as further explanations about the content posed in that question. To operate properly, laptop displays require an alternating current power source. BTX was designed as a replacement for ATX; it was expected to help cool devices that used a lot of power and created a lot of heat. Which type of RAM has a peak transfer of 12,800 MB/s? Thick clients are for the most part PCs, the typical desktop computer. Multimeter C. Recycle it. 4-pin power cable O D. Wrong voltage to the CPU. Raising the temperature will have no effect. The device is disabled. B 48. It can test each individual wire's voltage. However, 72° Celsius becomes less typical. That'll stop 'em right in their tracks! Theorem 2007 Theorem admin password does not prevent any of the other listed answers. 128-bit O C. USB flash drives won't fit inside a typical smartphone and so are relegated to hanging on people's key chains and acting as mobile transporters of data. 802.11a B. 4 Domain 3.0: Laptops (11%) . Detailed Answer: 76 CPU RAM PC Card Keyboard 82. 127.0.0.1 Quick Answer: 63 Detailed Answer: 73 O B. The Class A private range is within the 10.0.0.0 network. Use a line conditioner for the correct voltage. Which of the following is the best media for this scenario? The user password-protect whatever operating system is running on the computer, but it does it from the firmware level. Which type of client computer does the organization most likely use? Do not try to fix the problem if the scope of work is outside your knowledge. 40 Chapter 9: 220-802 Practice Exam B. The book also comes with a supplemental disc. 189 Chapter 9: 220-802 Practice Exam B. The book also comes with a supplemental disc. 189 Chapter 9: 220-802 Practice Exam B. Torx wrench B. 5 Gbps 67. Do not throw away or incinerate toner cartridges. The BTX form factor provides the most room for effective cooling in a computer case. Media Access Control addresses are usually not changed on a network adapter, although they can be masked. PCIe O C. B 92. What should you do? Every computer using TCP/IP gets this address; it is used for testing. Transfer toner from the drum to the paper C. Lower the humidity. Other common
rotational speeds include 5400 RPM; and 15,000 RPM; and 15,000 RPM. Work in a carpeted area. IP addresses can be managed from a central location. 277 Answers and Explanations . The ability to use unsigned drivers Quick Answer: 63 Detailed Answer: 66 C. The power cord carries 120 volts at 15 amps or 20 amps, and the telephone cord carries 80 volts when it rings. PCI is the predecessor to PCIe but is rarely used for video anymore; it is limited to 133 or 266 MB/s depending on the speed. PCI Express (PCIe) offers the highest video performance. They require fiber-optic connections. USB card O D. The hosts file on the computer can be validated for proper entries. 29 Domain 1.0: PC Hardware . C 7. Those standards are ratified by the Telecommunications Industries Association/Electronics Indu title and author as well as your name, email address, and phone number. O O O Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 63 A. The laser printer uses toner. 34. Static contrast ratio measurements are static; this done as a test with a checkerboard pattern. 63 Answers and Explanations . Check the voltage selector on the power supply. Router O D. 12. You could tell the printer that it is bad to smoke, but that would be belligerent and would probably show that you have been working too hard. Prevents an attacker from opening the case Quick Answer: 70 220-801 Practice Exam B 51 ✓ Quick Check 39. Steps to Getting Certified and Staying Certified Review Exam Objectives Review the certification objectives to make sure you know what is covered in the exam. Tell the customer to read the manual. A router broadcasts all data packets that are sent on the network, and a switch transmits data directly to the device. 77. 89. Firewall O D. A line filter shields the phone line from digital noise and interference caused by telephone devices and makes DSL communications possible. These types of video cards have much faster RAM access than motherboards do. 98. 800 Mbps O E. Normally this is wired with the 568B standard on each end. 125 Domain 1.0: Operating Systems (33%). Because the immediate danger is gone, call 911 right away. In rural areas, people may still use internal or external dial-up modems. Channel B. Moving your CPU's speed beyond its normal operating range is called . 304 General Practices for Taking Exams . A router will determine the best route for data. C 87. Who is Ray? What are advantages of using the Dynamic Host Configuration Protocol (DHCP)? Detailed Answer: 65 Case fans CPUs Heat sinks Memory modules 3. A hardware-based firewall will usually connect to the network via RJ45; regardless, it will have only a few connections. The next step would be to shut the power off at the electrical panel or call the building supervisor to have the power shut off. C 65. O Quick Answer: 63 Detailed Answer: 66 A. How should you clean this? To reduce the chance of electrostatic discharge (ESD), use an antistatic wrist strap and mat. 7200 RPM is a typical speed of a hard drive—rotational speed, that is. D 77. Wrong CPU driver. Line filters are required for DSL modems to share phone. A 24. Testing tools are a key ingredient in a computer technician's toolkit. Then apply first aid and CPR as necessary. COM1 (communications port 1) is a serial port; it sends or receives one bit at a time, up to 115,200 Kbps. Quick Answer: 67 Supervisor User Administrator Local 18. The rest of the terms are not used in relation to this concept. Thermal 75. 250 Quick-Check Answer Key . 38. Coax splitter 98. Unsigned drivers are based on the operating system itself; whether that particular OS is 32-bit or 64-bit will not be a factor. 74. 298 More Test-Taking Tips . Use an antistatic mat. Line conditioners simply clean the power for a specific voltage. A typical example is the 9-pin male DE9 port (inaccurately referred to also as the DB9). DDR3-800 Quick Answer: 69 O B. Plus, CompTIA's certifications are vendorneutral and offer proof of foundational knowledge that translates across technologies. 99. Which of the following IP addresses would a technician see if a computer is connected to a multifunction network device and is attempting to obtain an IP address automatically but is not receiving an IP address from the DHCP server? (Select the two best answers.) O O O Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 74 A. VGA, RGB, and DVI are video standards only, with DVI being the newest and most commonly used on PC monitors. Incorrect CPU has been installed. Which of the following is the newest type of mouse connection? Newer versions of IEEE 1394b can support 3,200 Mbps, but an IEEE 1394b port on a computer will often allow the use of unsigned drivers. There is no DDR2-1600. Some of these people are coworkers. 91. 70. Prowse is an author, a computer network specialist, and a technical trainer. 3.1 GHz is a common CPU frequency. To truly protect from EMI, fiber-optic is the best way to go. 15-pin power connectors are used for SATA drives. A switch broadcasts all data packets that are sent on the network, and a router transmits data directly to the device. Client/Server O C. Thermal 35. Power management settings on the laptop. Laptops can operate properly when connected to the AC power adapter or when using the battery only. This will determine if IPv6 is working correctly on the network traffic. However, installing the OS to one drive and storing data on the second drive can go a long way to making both drives last longer. Memory controller Quick Answer: 63 Detailed Answer: 74 220-801 Practice Exam B 57 ✓ Quick Check 71. Water will most likely not damage the screen. DDR3-1600 has a peak transfer rate of 12,800 MB/s. 82. He's just another fictitious character in this book. A router can limit network broadcasts through segmenting and programmed routing of data. RGB O C. 802.11a and g have a maximum DTR of 54 Mbps. PCL stands for Printer Command Language, developed by HP so a computer can properly communicate with dot matrix or thermal printers. Of the listed answers, 802.11n has the fastest data transfer rate at a maximum of 600 Mbps. The best thing is to ignore it and act as if it never happened. Overclocking B. A processor with several cores would be known as multi-core (quad-core or hex-core). Setting an admin password in the BIOS prevents a user from rearranging the boot order. The customer is not supposed to be supertechnically oriented. You need to expand the peripherals of a computer, but the system doesn't have enough ports. They cannot be used with IPv4. 8 GB might be the amount of RAM you install in a computer or the size of a USB flash drive. The exam verifies an individual can troubleshoot networking and security issues within operating systems such as Apple, Android, Windows and more. Home theater PCs (HTPCs) require an HDMI output, surround sound, a small form factor, and possibly a TV tuner. Increase the amount of RAM on the PC to increase the page file. Try not to accuse a user of accessing inappropriate websites because this could be considered inflammatory. and harassment. 2 CompTIA® + 220-801 and 220-802 Practice Questions Exam Cram . USB C. It might be seriously malfunctioning, so pull the plug. O O Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 76 A. 160 v Chapter 8: 220-802 Practice Exam B. 19. Of the answers listed, 172.17.58.254 is the only valid IPv4 address for a network host. D 14. O Quick Answer: 63 Detailed Answer: 75 A. What is the main advantage of selecting a 64-bit operating system over a 32-bit operating system? The physical cable that connects to the following is not affected by EMI but requires specialized tools to install? Which of the following is second O D. Normal host IP addresses' first octet will either be between 1 and 126, or 128 and 223, but not between 224 and 255. CMOS O B. D 66. Whenever you're working in someone's home, make sure that there is an adult available. A 16. Contact CompTIA: Call 866-835-8020 ext. Loopback plug Quick Answer: 63 Detailed Answer: 74 56 Chapter 3 < Quick Check 66. 27. A second hard drive should be treated as a completely separate device. Client/Server is less a networking technology and more of a way that computers communicate; it has a centralized server that controls the network. POST O D. The impact printer uses a print head, ribbon, and tractor feed. You see solid green (1000 Mbps or 100 Mbps) or yellow (10 Mbps) on the link light (if there is a separate link light). A firewall will inspect traffic and allow or deny it access to the network. Check for a compatible power adapter for that country. 126 Domain 2.0: Security (22%) . 38 Domain 5.0: Operational Procedures. Both of these have given way to the touchpad and external USB mice. On older Intel systems and AMD systems, the northbridge is the first of a pair of chips in the chipset (the other is the southbridge). He runs the website www.davidlprowse.com, where he gladly answers questions from students and readers. The older COM port is used by dial-up modems. C 96. Single channel memory is 64-bit. Which of the following traits and port numbers are associated with POP3? Good luck! 44 Chapter 3 < Quick Check Practice Questions 1. Overspeeding 15. A tone and probe kit is used to test telephone and network connections for continuity. Ethernet (which was originally ratified by the IEEE as the 802.3 standard) is a shared technology by default; only one computer can communicate on the network at any given time. Email: Mail: David Dusthimer Associate Publisher Pearson IT Certification.com for convenient access to any updates, downloads, or errata that might be available for this book. 255 is a commonly used number when it comes to maximums but doesn't apply to IEEE 1394. It is called a field replaceable unit (FRU) for good reason. Quick Answer: 64 Detailed Answe is also the dynamic contrast ratio, a newer technology in LCD displays that adjusts dynamically during darker scenes in an attempt to give better
black levels. The rest of the answers can be configured in the BIOS. They are supported by all routers. Network adapter O C. 304 Smart Methods for Difficult Questions. B 71. IEEE 1394b is capable of 800 Mbps. O O O Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 67 A. Computers can automatically get new addressing when moved to a different network segment. Administrator password is used in the BIOS (CMOS) to prevent end users from accessing the BIOS contents? Impact printers use ribbon, inkjet printers use ink cartridges, and thermal printers use specially coated paper. 448-bit 64. Which function is performed by the external power supply of a laptop? 206 Quick-Check Answer Key . A+ certification signifies that the certified individual possesses the knowledge and skills essential for a successful entry-level (6 months experience) computer service technician, as defined by experts from companies across the industry. In order to receive the CompTIA A+ core and 220-801 A+ Core and 220-801 A+ Core and 220-802 A+ Essentials. O O O Quick Answer: 70 A. 142 Quick-Check Answer Key . Trademarks Copy Editor Megan Wade All terms mentioned in this book that are known to be trademarks or service marks have been appropriately capitalized. It uses multiple "channels" to transmit and receive information. I will carefully review your comments and share them with the author and editors who worked on the book. Spray the cleaner on the top of the monitor and wipe down. 40. A lot of companies sell products that are half isopropyl alcohol and half water. If you have that experience, then this book will be an excellent late-stage study tool. Northbridge B. That address is within the Class E reserved range. A 23. PCI Quick Answer: 63 Detailed Answer: 75 O B. 220-801 Practice Exam B 71 45. Recycle toner cartridges according to your company's policies and procedures, or according to municipality rules and regulations. It is used for telephone landlines. The higher percentages you score on practice question products, the better your chances for passing the real exam. Answer: A. Assure the customer that the problem will be fixed very soon. C 82. Printer B. Quick Answer: 63 Detailed Answer: 63 O C. Receives inbound e-mail on port 25 O C. Answer: 63 Detailed Answer: 74 O B. Sends outbound e-mail on port 25 69. IPv6 and IPv4 can co-habit a computer with no problems. 6. Security settings on the laptop. The display is not getting power. SCSI connectors are not often found on today's printers; regardless, they would indicate a local connection, not a network connection, not a network connection. 7 Practice Exam B 73 57. What is the most likely cause? 41. 22. O O Detailed Answer: 68 A. The boot sequence (also known as boot priority or boot order) allows you to select which device will be booted off of first (hard drive is the most secure). A Torx wrench is used to open computers and laptops.) PS/2 mice are also rare. Never disassemble the power supply. D 84. Lowering the humidity increases the chances of ESD. .MOV is a QuickTime file format meant to be used with movies and other video. D 10. DDR3-1600 \bigcirc D. Advantages of using DHCP include: IP addresses can be managed from a central location and computers can automatically get new addressing when moved to a different network segment (perhaps one that uses a different DHCP server). SMTP is used by e-mail clients to send e-mail. However, if you look closely at the display, you can see that Windows is running, but very dimly. Microsoft's APIPA, however, uses the 169.254.0.0 network which is private. 12 Mbps is the data transfer rate of USB 1.1 Full Speed. B 32. 76 Chapter 3 80. A group of users in ABC Corp. viii It Pays to Get Certified In a digital literacy is an essential survival skill. 169.255.10.41 C. CompTIA A+ Cert Guide, Third Edition by Mark E. 400 Mbps is the speed of IEEE 1394a. • Mandated/Recommended by organizations worldwide—Such as Cisco and HP and Ricoh, the U.S. State Department, and U.S. government contractors such as EDS, General Dynamics, and Northrop Grumman. Plus, a virtualization workstation will often have more than one virtual machine running, increasing its need for RAM even further. 24. A router allows access to another network or the Internet. 2. 11.58.254.169 Quick Answer: 63 Detailed Answer: 73 B. If you see a yellow exclamation point in the Device Manager, this indicates that the device is malfunctioning. 3 Domain 1.0: PC Hardware (40%) Data Execution Prevention (DEP) is a security feature in today's operating systems; it stops a program from executing code in a forbidden area of memory. The idea behind this is to stop a person from attempting to boot off of an optical disc or USB flash drive. Condition the drum to be written to B. The SSID is the most important piece of information required to connect to a wireless network; it is the name of the wireless network. You are asked to fix a problem with a customer's domain controller that is outside the scope of your knowledge. The key is to make sure the PC has proper airflow. In addition, place components in antistatic bags when they are not in use. Try not to get any liquid in the cracks at the edge of the screen. 58. 802.11b has a maximum of 11 Mbps. Serial mouse B. Modems, network adapters, and TV tuner cards all have their own purpose and do not allow additional peripherals. It uses port 25. It's the ideal foundational certification to get started on a career working with cutting-edge information technologies. Touchpad Quick Answer: 63 Detailed Answer: 67 48 Chapter 3 / Quick Check 22. Keep in mind that this is not the real exam. However, it can test only one pair of the wires in the cable. Detailed Answer: 75 PXE PCI PCL PnP 77. 8 Domain 2.0: Networking . ROM O D. CompTIA A+ Exam Cram, Sixth Edition by David L. 127.0.0.1 is the IPv4 loopback address. Windows generates all kinds of error codes but not beep codes. Call maintenance. One way to provide preventive maintenance to a hard drive is to do what? Quick Answer: 75 58 Chapter 3 - Quick Check 76. O O A. Use a surface dust cleaning solution. Port 80 is HTTP. Avoid the customer and get the job done quickly. 72. The Torx wrench is a special tool used to remove screws from the outside of a case; often, proprietary computer manufacturers will use these screws. Printers with a built-in RJ45 connector are network ready. 94. CV0-001 PREMIUM PDF file Use code "25SALE": \$30 \$40 711 Questions &... Which type of cable has only two twisted pairs? RTC stands for real-time clock; it is the device that keeps time on the motherboard. The fuser being wet C. Although multimeters and screwdrivers are tools you might use, they might not always be worn. Keep an area of airflow around the drive so that it doesn't overheat. 53. (Select the three best answers.) O Quick Answer: 63 Detailed Answer: 75 A. Tell the customer to get back home as soon as possible. Intrusion detection 68. 95. If you want to access more than 4 GB of RAM, you will need a 64-bit operating system. If your circuit has dirty power (for example, it is fluctuating between 113 and 130 volts), a line conditioner will keep it steady at 120 volts. Coaxial 85. As part of the boot process, power needs to verify the CPU. The ability to run multiple 16-bit programs in separate memory spaces 14. This configuration might be done in the BIOS of the computer (if the network adapter is integrated to the motherboard), within a special program in Windows, or one that boots from CD (if the network adapter is an adapter card). RJ11 ports are used by modems and dial-up Internet connections. When data is flowing through the activity light, it should blink or flash rapidly, in an erratic fashion. 25. You can email or write me directly to let me know what you did or didn't like about this book—as well as what we can do to make our books. better. Solid green O D. Compact Flash comes in varying sizes (all greater than 1.44 MB) and is considered a card, not a disk. External USB hard drive O D. Raise the temperature. Which of the following devices is the least likely to be replaced on a laptop? Laptop keyboards fall victim to coffee, overuse, and other damage over time and sometimes need to be replaced. B 220-801 Practice Exam B 65 Answers and Explanations 1. Compact Flash Quick Answer: 63 31. IEEE 1394 O D. Detailed Answer: 74 Throw it away. RAM is more essential to the virtualization
workstation than any of the other types of custom PCs listed. B. 93. In which of the following slots would you place an 8x video card? 152 Domain 1.0: Operating Systems. Solid-state hard drives are gaining in popularity because they have no moving parts, are quiet, and work as fast as (if not faster than) traditional magnetic hard drives. Use this information to learn why an answer is correct and to reinforce the content in your mind for the exam day. 230 Chapter 10: 220-802 Practice Exam D. Converts AC power to DC power 40. The CompTIA A+ certification is the first step of your professional IT journey. Your organization relies heavily on its server farm for resources and is less reliant on the client computers. The developing rollers C. Class 1 has a 100-meter range, and Class 3's range is approximately 1 meter. Any card named with a number followed by an x is most likely an AGP card, (2x, 4x, 8x, 16x). ATX O C. (Select the two best answers.) O O O A. Which of the following tools could a person use to test an AC outlet? Use acronyms so that the customer feels comfortable about your knowledge. An RJ11 jack Quick Answer: 63 Detailed Answer: 65 B. C and D 12. 308 Beyond the CompTIA A+ Exam . This technology is implemented as flash-based hard drives or as adapter cards with DDR memory and a battery. Spray the cleaner on a clean, lint-free cloth first. This aids in keeping the CPU and other devices cool. 36. However, Ethernet switching alleviates this by segmenting computers and redirecting information to other systems via MAC address. Still, BTX combines a large cooling area with smart design and positioning of devices that allows for more cooling than is possible with ATX and its derivatives, or the various ITX versions. DDR2-800 34. You should install a USB add-on card. Exam 220-802 | CompTIA A+ Exam ExamCollection Verified - Instant Download. 125 Exam Breakdown . What question should you ask first? This allows the network card to boot off of the network, locate a network installation begin. O A. All of the questions in this section are multiple-choice. B 47. No part of this book shall be reproduced, stored in a retrieval system, or transmitted by any means, electronic, mechanical, photocopying, recording, or otherwise, without written permission from the publisher. The physical hammering action causes the carbon backing to take effect and apply text to the next layer of paper. If the CPU is running beyond the recommended voltage range for extended periods of time, it can be a sign of a failing CPU. You and a co-worker are running network cables above the drop ceiling. Because of this inefficient method, switches are preferred. It should not cause paper-feed errors unless the constraining tabs are too tight. Check in the BIOS to see if the CPU is overclocked or not. C and D 25. Power savings Quick Answer: 70 52 Chapter 3 🗸 Quick Check 45. 802.11b O C. Broadcasts data to all network devices O D. Clean the drum 95. FE80::/10 is the range of autoassigned addresses in IPv6. 8P8C 15-pin D shell microATX RG-6 Quick Answer: 63 Detailed Answer: 64 Detailed Answer: 65 Detailed Answer: 65 Detailed Answer: 66 Detailed Answer: 66 Detailed Answer: 64 Detailed Answer: 66 Detailed Answer: 68 Detailed Ans data, and S-Video, but 7-pin power connections are less common. 297 Review What You Know . Which of the following devices should you place on the phone line so that the line can be shared with a phone and the DSL modem? A and B 99. 172.16.10.10 is a Class B private IP. The program is backed by major computer hardware and software vendors distributors, resellers, publications, and industry associations. vii We Want to Hear from You! As the reader of this book, you are our most important critic and commentator. Which of the following best describes the differences between a switch and a router? video and audio signals. 6 Chapter 2: 220-801 Practice Exam A. 1000 Mbps O O B. An SCSI connector 9. O E. Thin clients normally have no hard drive; this is why they are referred to as diskless workstations. To figure out the data transfer rate of DDR3 by the consumer name "PC312800", just look at the number within the name and add "MB/s" to the end. You are required to rip the contents of a CD to a compressed file format that can be read easily on PCs, Linux computers, or Macs. 255 4. Download Exam N10-005 PDF files free. Ray wants to install a new internal SATA hard drive in his computer. You could also make this yourself. Which port is typically known as a serial port? This strikes the ribbon, and consequently the paper with a printhead. Practice Questions: There are 700 questions that will help you learn, drill, and review for the exam. A 58. 79 Practice Questions : It is also used with different of the exam. A 58. 79 Pr media. • Starting Salary—CompTIA A+ Certified individuals can earn as much as \$65,000 per year. D 72. 60° Celsius O C. needs to back up several gigabytes of data daily. Quick Answer: 76 Isopropyl alcohol Mild detergent Water Boric acid 88. D 78. 79. Which device limits network broadcasts, segments IP address ranges, and interconnects different physical media? The traditional hard drive is still the magnetic disk. LCD contrast ratio is the brightness of the or fitness is implied. A dual-core processor has several unique cores, with the same cache, on two different chips. Parallel cable O C. Network installations require that the network card be configured for Preboot Execution Environment (PXE). For example, if you wanted to implement MAC filtering, you would have to log in to the WAP with an admin password to configure it. Quick Answer: 63 Detailed Answer: 67 Magnetic Optical Impact Solid-state 23. SDRAM, DDR, DDR2, and DDR3 area by a configure it. Quick Check 50. An "administrator" password is something used in Windows or on a networking device, and a local password is something used in Windows or on a networking device. all examples of DRAM. Media access control addresses can be changed. How should you apply spray cleaner to a monitor? What is the recommended method for handling an empty toner cartridge? 124 Chapter 6: Introduction to the 220-802 Exam . It can also be used to remove screws (albeit smaller ones) from a laptop. 802.11g \bigcirc D. \bigcirc Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 63 Detailed Answer: 63 Detailed Answer: 69 B. Need Further Study? Case fans are measured in mm (millimeters). • Recommended or Required by Government and Businesses—Many government organizations and corporations either recommend or require technical staff to be CompTIA certified. Fiber \bigcirc D. In secret, tell everyone who was on the list. How many pins would you see in a high-quality printhead on a dot matrix printer? Use an antistation strap. Also, MAC address filtering is not enabled by default, so the MAC address might not be needed. Most PC technicians will not work on domain controllers because they are advanced Microsoft servers that are used in client/server networks. Sends outbound e-mail on port 110 O D. A host on the network is any computer or network device that uses an IP address to communicate with other computers or devices (hosts). STP is difficult to install and must be grounded; because of these things, it is found less commonly in networks. Recommended A+ Core Exam Practice Material: The A+ Certification is a testing program sponsored by the Computing Technology Industry Association (CompTIA) that certifies the competency of service technicians in the computer industry. 74 Chapter 3 65. STP is a type of twisted pair; all twisted pair is limited to 100 meters or 328 feet. A 100. On Core 2 Duo, Quad, and Extreme systems, the memory controller is located within the chipset and is known as the Memory Controller Hub (MCH) by Intel, but it is also referred to as the northbridge. 802.11n 56. 1 meter 27. It often has only one connection, a single RJ45 port. Coaxial cable is limited to 200 or 500 meters, depending on the type. The book offers 700 questions that will help you practice each exam domain and will help you assess your knowledge before you take the real exam. Turr off the printer. 192.169.0.1 58. What are
the respective functions of the two corona wires in a laser printer? The pickup rollers 25. Note that magnetic disks are spelled with a k, while optical discs are spelled with a c. The fuser heats paper to around 400° Fahrenheit (204° Celsius). Exam 220-801 | A+ exam ExamCollection Verified - Instant Download. A dual-core processor has two cores, with separate caches, on the same physical chip. 15 Domain 3.0: Laptops . Printer power supply can. Where is the memory controller located in a Core 2 Duo system? Certification Advances Your Career • The CompTIA A+ credential—provides foundation-level knowledge and skills necessary for a career in PC repair and support. Tell the customer that you are not responsible for the child. Increasing RAM does not necessarily increase the pagefile, and regardless, this won't prevent problems with a hard drive over the short term, but it can make the hard drive work more efficiently. 480 Mbps O D. Answers C and D. Fiber optic O D. Spray evenly on the monitor. Here you can download free practice tests for such certifications as MCSA, MCSE, MCDBA, MCSD, A+, Network+, Security+, CCNA, CCNP, IBM,... A customer experiences a server crash. High-quality dot matrix printheads can come in 9, 18, or 24 pins, with 24 being the highest quality CompactFlash (CF) cards are a bit bulkier and might be used in conjunction with PCs, laptops, and handheld computers. Modem B. 72° Fahrenheit is excellent room temperature for computers to run at their best. O C. AGP is the Accelerated Graphics Port, usually a brown slot on the motherboard Audio/video workstations require specialized audio and video cards, fast hard drives, and dual monitors. The developing rollers transfer ink to the imaging drum. Drivers are software that allows the operating system to communicate with hardware; they can be configured in the Device Manager in Windows. 28. 80mm and especially 120mm are very common. Although it is possible to refill toner cartridges, it is not the recommended way to handle an empty cartridge because it is messy and timeconsuming. What is the total number of devices that can be daisy-chained to an IEEE 1394 port? A power supply (PSU) tester is used to test the main P1 power connection (and possibly other connections) of a power supply. How should you remain in the face of adversity? PSU tester C. Again, the goal here is to make sure you understand all of the concepts before moving on to the next test. 13. C 20. What operating CPU temperature is typical? 228 Answers and Explanations . 80. 33. You don't want to avoid the customer, but you don't have to engage in anything except fixing the problem. C 42. Which of the following is not a configuration that can be made in the BIOS? However, it is possible that the switch might connector. What should you do in this scenario? O Quick Answer: 63 Detailed Answer: 72 A. Multipart forms such as these are commonly used for receipts. The inverter has been shorted out. In current motherboards, which memory bus width can be accomplished by using the dual channel technology? DVD O B. Port 80 C. 29 Domain 2.0: Networking . The darkest and lightest outputs O D. Client/Server O D. The IPv6 loopback address used for testing is ::1. Quick Answer: 63 Detailed Answer: 71 \bigcirc D. Which types of cables should he connect to the drive? 249 Practice Questions . Unlike the first exam, this one is freestyle, meaning the questions are randomized. 192.168.0.0 \bigcirc D. Multimeter B. The less jargon, the better. 32. Okay, we are halfway through the exam. Hard drives run pretty hot; keeping an area of airflow around the drive can help to keep it cool. Setting an administrator password in the BIOS accomplishes which of the following? DHCP has nothing to do with the Hosts.txt file; that file contains static entries of hostname to IP address conversions. 802.11b C. Thin client O D. A heat sink is used to disperse heat away from a CPU. SATA hard drives will commonly have a DTR of 3 Gb/s (300 MB/s) or 6 Gb/s (600 MB/s). That's like an oven. 46. DVI Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 63 Detailed Answer: 63 Detailed Answer: 64 DVI Quick Answer: 65 Detailed Answer: 66 B. Make sure that the customer has a path toward a solution before dismissing the issue. make sure the computer is unplugged before working on it; and 2) don't touch any components that hold a charge. A processor will not run that cold (but it would be pretty efficient if it did!). Which of the following should you use to clean a monitor's screen if you are not sure how to do so? 54. Fuse the toner to the paper O D. Single-mode fiber C. Bulk Sales Pearson IT Certification offers excellent discounts on this book when ordered in guantity for bulk purchases or special sales. If an incorrect CPU has been installed, the system will probably not boot, especially if the BIOS doesn't recognize it. O Quick Answer: 63 A. ISBN-13: 978-0-7897-4974-1 ISBN-10: 0-7897-4974-2 Printed in the United States of America First Printing: July 2012 Development Editor Box Twelve Communications, Inc. 279 Chapter 11: Review of the 220-802 Exam. As an administrator, you should change the BIOS boot order to hard drive first. A PCIe x16 version 3 card can transfer a maximum of 16 GB/s. To figure out the data transfer rate when given only the I/O bus clock speed (for example, 800 MHz), multiply that number by 8 and solve for megabytes: 800 MHz×2×8 = 12,800 MB/s. Which technology has the fastest data transfer rate? Virtualization workstations definitely need a hard drive and require lots of other resources; they are not as dependent on servers. 72° Fahrenheit O D. Power consumption B. C 83. On the CPU O O B. A and C 8. 27 Answers and Explanations . The display brightness of a laptop isn't affected by any security settings. Overdriving O C. A 64. Many computers today, especially custom computers such as virtualization systems and gaming computers, require more than 4 GB of RAM so a 64-bit operating system is the only choice. It has three rows of five pins. 24 B. A 70. It cannot be used to communicate with other hosts on the network. She asks you what safety concerns there might be. If you need to replace the fuser, let the printer sit for 10 or 15 minutes after shutting it down, and before maintenance. A driver is not properly installed for this device. 130 Domain 1.0: Operating Systems . B 52. Prevents a user from rearranging the boot order O O B. Which of the following controls the connection between the CPU and the PCIe x16 expansion slot? It replaces PS/2 as today's standard. DRAM O D. The CPU could overheat if thermal compound has not been applied correctly operly (rare). PCIe cards place the x before the number (for example, x16—pronounced "by 16"). Of the following, which IP address is private? SD 93. PCIe 8. Just like PCs, though, the CPU should rarely fail. 3 Exam Breakdown . 256-bit is a common bit length used by the Advanced Encryption Standard (AES). n) or 11 it is not seated bi Advanced Audio Codec (.AAC) is used more commonly on Apple computers and devices and gaming consoles. 130 Domain 2.0: Security . On newer Intel systems, the northbridge functionality is combined with the CPU. The touchpad is the most likely of the listed devices. 140 Domain 4.0: Troubleshooting . CPU is beyond the recommended voltage range. The maximum length of a standard USB 2.0 cable is 5 meters. Take a deep breath—then continue on with power! (Pun intended.) 51. 80 Quick-Check Answer Key. It isn't quite possible to add cache to a hard drive; the cache on most hard drive; at the wireless access point, not from the client computer.) The administrator password is needed only if you wanted to make configuration changes to the wireless access point. A 40. The network speed can automatically adjust based on the type of traffic being generated. Provse 800 East 96th Street, Indiana 46240 USA CompTIA® A+ 220-801 and 220-802 Authorized Practice Questions Exam Cram, Fifth Edition Copyright © 2013 by Pearson Education, Inc. You need to install a printer that can be used to print payroll checks on paper forms that have a carbon backing. Memory O D. IPv6 is a logical concept. In order to perform a network installation of Windows, which of the following must be supported by the computer's network interface card? The separation tab B. Which type of memory does the smartphone most likely use? It usually has a higher ratio, but it should be noted that there isn't any real uniform standard for measuring contrast ratio. It is common to install and remove PC Cards. FireWire was originally developed by Apple, and although the two names are often used interchangeably, the PC standard is IEEE 1394. Answer: 63 Quick Answer: 64 Quick rate. 10 meters O C. 4. SCSI 16. 100,000,000 bits per minute O B. However, to achieve this, you need to have the right wireless access point, configured properly, with client computers that are also compatible with the 802.11n standard. Display resolution and brightness C. 127 Test-Taking Tips. O O Quick Answer: 63 A. VGA Ouick Answer: 63 Detailed Answer: 71 O B. C 73. IEEE 1394 or FireWire ports. 7. If the computers to each other; they are used to connect external hard drives to IEEE 1394 or FireWire ports. 7. If the computer fails to obtain an IP address from a DHCP server, Windows will take over and apply an Automatic Private IP Address (APIPA). 5. This tests them all in one shot. 297 Review of the Domains . If you appear to be wavering when problems occur, the customer will have less confidence in your skills (as will you). Help the customer find the appropriate channels to fix the problem. 5 meters O D. 127 Getting Ready for the Practice Tests . When you need to make a technical decision, be certain and decisive and implement the solution immediately. A client brings in a printer that is giving a paper-feed error. 127 O B. Molex power connectors are used by IDE drives. 39. Over the past several titles for Pearson Education,
including the well-received CompTIA A+ Exam Cram and CompTIA Security+ Cert Guide. Which tool would you use to test a 24-pin ATX 12v power connector? Telling the customer to read the manual is just downright rude. Within the chipset O D. C 45. 5 Test-Taking Tips . This seal signifies this content covers 100% of the exam objectives and implements important instructional design principles. Also, consider raising the humidity Cat 5e patch cable O B. C 98. A 11. A 51. Buffer B. (Select the best answer.) O A. D 57. Overclocking is the act of increasing your CPU's operating systems (virtual machines or VMs) require a lot of RAM to run, much more than any other application. Gaming PCs biggest requirements are CPU and video card. Hints for Using This Book Complete your exams on a separate piece of paper so that you can reuse the practice questions again if necessary. Quick Answer: 67 C. Some of the primary benefits individuals report from becoming A+ certified are: • More efficient troubleshooting • Improved career advancement • More insightful problem solving ix CompTIA Career Pathway CompTIA offers a number of credentials that form a foundation for your career in technology and allows you to pursue specific areas of concentration. B 6. You can expect questions from any of the domains, in any order. Physically, the four-port section of the device is the switch portion and the single port that leads to the Internet is the router portion. Intrusion detection can be enabled and will log if a person opened the computer case. 49. And boric acid would just be plain silly (and dangerous). 65 iv Chapter 4: 220-801 Practice Exam C. USB flash drive O D. 5 Domain 4.0: Printers (11%). Quick Answer: 72 54 Chapter 3 / Quick Check 55. In a large corporation (or enterprise environment), tape backup such as the Digital Linear Tape (DLT) is the best media for backing up. STP O D. This is the protocol used during online banking sessions, or if you go to checkout when shopping online. 308 vi About the Author David L. The Class C private range is 192.168.0.0-192.168.255.255. C 61. PCI Quick Answer: 63 Detailed Answer: 63 O B. O O Quick Answer: 63 Detailed Answer: 64 Detailed Answer: 65 Deta a screen with, use water. PS/2 O D. Dual-core processors are generally more efficient than older single-core processors and often use less voltage. In this scenario, the organization probably has thin-client computers for its users. 63 O C. B 55. What is the local loopback IPv6 address? DLTs and Super DLTs (SDLT) can have a capacity as high as 800 GB, allowing for a huge amount of backup as compared to DVD and dual-layer DVD (4.7-17 GB) and external USB hard drives (up to 64 GB or so, though this number will undoubtedly increase as time goes on). You can always review the topic and do the guestions again. He is dazed and can't stand, B 21, O O Ouick Answer: 64 Detailed Answer: 78 A Nor is any liability assumed for damages resulting from the use of the information contained herein. Virtualization workstation B. Otherwise, if the address, it would be able to communicate only with other systems using APIPA addresses. Internal SATA drives connect to the motherboard (or SATA card) via a 7-pin data cable and a 15-pin power cable. Single-mode fiber-optic cable can send data farther than any of the other answers—up to hundreds of kilometers. A customer reports that an optical drive in a PC is no longer responding. Telephone cord O D. Although every precaution has been taken in the preparation of this book, the publisher and author assume no responsibility for errors or omissions. It exists on every computer that runs IPv6. O O Quick Answer: 77 A. To figure out the data transfer rate of DDR3 from the name "DDR3-1600", simply multiply the 1600 by 8 (bytes) and solve for megabytes: 12,800 MB/s. 63. 29. B 63. Thermal 63. Which type of card should you install? D 75. Tell the printer it is bad to smoke. Associate Publisher Dave Dusthimer Acquisitions Editor Betsy Brown All rights reserved. • Valued by Hiring Managers—Hiring managers value CompTIA certification because it is vendor- and technology-independent validation of your technical skills. You don't see COM ports on PCs today, but you might still see them as an add-on card in the field, used to access networks as an administrator failsafe in case other Internet connectivity methods fail. 97. The CPU has overheated. The standard is the size T-10 Torx wrench. 480 Mbps is the speed of USB 2.0. 5 Gbps is the speed of USB 3.0. 67. 104 Chapter 5: Review of the 220-801 Exams . 7200 RPM Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 76 60 Chapter 3 🗸 Quick Check 87. 8 O D. Serial mice were used in the early 1990s, and parallel was never really used for mice at all; it was used for printers and SCSI connections. certifications/testprep/examobjectives.aspx Practice for the Exam After you have studied for the certification, take a free assessment and sample test to get an idea what type of questions might be on the exam. Detailed Answer: 70 B. Beep codes are generated by which of the following? Disassemble the power supply and remove the dust. Low case temperatures are a good thing (if they aren't below freezing!), and spyware is unrelated to this issue. It prints them one at a time according to which job entered the queue first. LPT1 O D. In the charging step, the drum is conditioned/charged by the primary corona wire (negatively charging it) and prepared for writing. DVI is a video port. Which of the following storage technologies is used by traditional hard disk drives? 159 Domain 4.0: Troubleshooting. 34 Domain 3.0: Laptops . A 90. 84. How can you reduce the chance of ESD? What should you tell her? The fuser releasing toner 10. Refill it. USB \bigcirc C. B 17. 205 Practice Questions . \bigcirc B. Never spray any cleaner directly on a display. 26. Free course for CV0-001 in PDF format also you can read online. The power supply has failed. Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 63 Detailed Answer: 73 220-801 Practice Exam B 55 ✓ Quick Check O C. 64-bit B. BIOS reports low temperatures within the case. O F. 20. Exam PK0-003 ExamCollection Verified – Instant Download. 20 Domain 4.0: Printers . 100 meters B. When it comes to computer case form factors, which of the following provides the most room for effective cooling? The fuser is not wet or fragile, and it does not contain toner—that is contained by the cartridge. All of the other addresses could possibly be obtained from a DHCP server. ::1 O C. C 63 64 Chapter 3 88. If you didn't already, I suggest taking a break between exams. Certification proves you have the knowledge and skill to solve business problems in virtually any business environment. The operating range may be above or below that. But the router is in charge of connecting the LAN to another LAN, to the Internet, or to both. C 86. SSID O D. 150 Answers and Explanations. Smartphones typically use Secure Digital (SD) cards—more to the point, microSD cards. Always have a positive outlook. That one router will have ports for both types of connections. However, the two are often connected together. In fact, different make and model power adapters will usually not work with different laptops, even if the voltages are only slightly different. Make the customer truly feel comfortable by sitting down next to her and taking the time to explain the technical concept from a simple and concise point of view. 52. Parallel 79. In the transferring step, the paper is positively charged by the transfer corona wire, preparing it to accept the toner from the drum. 43 Practice Questions . This can be done by adding fans or using a liquid cooling system. You need to open the LCD panel to replace the inverter in this case. What should you do first? About the Technical Editor Aubrey Adams is an electronics and computer systems engineering lecturer and Cisco Networking Academy instructor at Central Institute of Technology. in Perth, Western Australia. Quick Answer: 63 Detailed Answer: 66 Monkey wrench Torx wrench Channel lock Pliers 13. A switch interconnects one or more networks. Prevents a user from reading e-mail C. The customer will have fewer concerns, and you will be more relaxed. Antistatic strap C. Learn on the job by trying to fix the problem. Rapid, erratic flashing O C. A 91. The beep codes come from the POST, which happens before moving on to the next one. They represent addressing using 128 bits. 90. Prevents a virus from infecting the MBR O D. 24 Quick-Check Answer Key. There are various loopback plugs, but these have nothing to do with testing an AC outlet. Increases voltage O B. PC Cards (PCMCIA) are commonly implemented as network adapters, modems, and more. Overclocking is when the CPU's voltage is raised and the speed is increased. Either way, it doesn't hold a candle to PCIe. 8. Use of a term in this book should not be regarded as affecting the validity of any trademark or service mark. An RJ45 jack O D. The acronym ROM usually refers to a chip on a circuit board that is not removable. 69. Detailed Answer: 77 .AAC .WMA .MP3 .MOV 92. Why would the display on a laptop get dimmer when the power supply from the AC outlet is disconnected? A 60. Sit next to the customer. Temperature thresholds allow you to set alerts and possibly shut down the system if the CPU runs too hot. The power management settings on the laptop can cause the display to automatically dim when the AC adapter is unplugged. O O O Quick Answer: 69 A. What wireless networking standard operates at 5 GHz only? A dual-core processor does not require more RAM than a single-core, but it usually requires more cache memory. A switch connects multiple computers together on the LAN; it does not limit IP-based network broadcasts. 40-pin data cable O C. D 89. D 97. B 27. Pearson IT Certification cannot attest to the accuracy of this information. Which of the following tools can protect you in the case of a surge? Cat 5e crossover
cable 73. On AMD systems and newer Intel systems such as the Core i5 or i7, the memory controller is located "on-die," meaning within the CPU. 60° Fahrenheit is equal to 15.5° Celsius. D 9. 129 Practice Questions. Switches send information to specific network devices based on their MAC addresses. What connector can have audio and video pass through it? 100. After a blackout, the power comes back on, causing a surge to occur on all the computers and equipment in the office. What is a possible symptom of a failing CPU? A 19. 192.168.10.10 2. Read-Only Memory (ROM) is usually not serviceable. RTC O C. When you arrive, the manager is upset about this problem. 802.11a operates at 5 GHz only. When testing the main 24-pin ATX power connector that leads from the power supply to the motherboard, use a multimeter. The sole purpose of this book is to provide you with practice questions that are complete with answers and explanations to help you learn, drill, and review for the CompTIA A+ certification exams. You just upgraded the CPU. Install a second hard drive. 121 Review of the Domains . B 56. C. Switch B. STP C. The author and the publisher shall have neither liability nor responsibility to any person or entity with respect to any loss or damages arising from the information contained in this book or from the use of the CD or programs accompanying it. In fact, a laser printer power supply does more work because it needs to convert for high voltages in the 600 V range. Quick Answer: 63 Detailed Answer: 76 220-801 Practice Exam B 59 ✓ Quick Check 81. Know the six main steps of laser printing; Cleaning, writing (also known as exposing), developing, transferring, and fusing. Quality of Service (QoS) adjusts the network speed based on the type of traffic generated. A 67. Which of the following power connections might be used by hard drives? DDR2-800 (like DDR3-800) has a peak transfer rate of 6,400 MB/s. If a separation tab fails, it might cause more than one sheet of paper to be entered into the printer. 37 Domain 4.0: Printers . DVI O D. 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless standards are 220-801 Practice Exam B 69 collectively known as 802.11 wireless when on battery power. There is a contract of the printer is a contract of the you can do in a situation like this. 60° Fahrenheit Quick Answer: 73 B. AMR 78. There isn't much you can do when a customer is upset except fix the problem! I'd be interested to see what would happen if a person asked the owner of the server out for a cup of coffee, but I'm pretty sure the reaction would be negative. C and D 79. 299 Taking the Real Exam . If a device has a working driver, then upgrading it will be up to you, but you won't necessarily be notified of this. Aubrey has authored Networking Academy curriculum and assessments and is a Cisco Press author devices, such as a computer to a switch. Which of the following form factors does a VGA connector comply with? The RJ45 jack enables a connection to a twisted-pair (most likely Ethernet) network. Always use an antistatic strap to avoid ESD (electrostatic discharge). 8 Domain 1.0: PC Hardware . D 54. Tone and probe kit Quick Answer: 78 220-801 Practice Exam B

Quick-Check Answer Key 1. You would probably need to replace other equipment, too, in this case. 169.254.0.0/16 means an IP address of 169.254.0.0/16 means an IP address of 169.254.0.0, indicating the network number is 169.254. Which format should you select? 156 Domain 3.0: Mobile Devices . Unlit B. Quick Answer: 63 Detailed Answer: 69 C. Remember that the switch is in charge of connecting devices on the LAN. C 34. After the answer key, you will find explanations for all of the answers. PnP stands for Plug 'n Play, a Windows technology that allows devices to be located and installed automatically. O O Quick Answer: 63 Detailed Answer: 73 A. O O Quick Answer: 63 Detailed Answe Answer: 70 A. Power surges can cause the inverter to short out, after which the coldcathode fluorescent lamps (CCFL) cannot get any power. He is no longer near the AC power line. O Quick Answer: 63 Detailed Answer: 70 A. 48. Most companies simply purchase new toner cartridges. 55. I know, I say this often to you the reader—however, you are a tech, so reading the manual is what you do. Multifunction network devices make matters confusing; they combine the functionality of a switch, a router, a wireless access point, and a firewall. 192.168.0.10 and 192.168.10.10 are Class C private IP addresses. As the POST checks all the components of the computer, it may present its findings on the screen or in the form of beep codes. HDMI 47. FE80::/10 60. It covers mobile, tablets, laptops, desktops and beyond. The wireless access point (WAP) might autonegotiate the channel. 81. (For example, Dell, Sharp, Ricoh, the U.S. Department of Defense, and many more.) • Three CompTIA Certifications ranked in the top 10—In a study by DICE of 17,000 technology professionals, certifications helped command higher salaries at all experience levels. Which tool should always be used when working on the inside of the computer? Exam N10-005 ExamCollection Verified - Instant Download. It is faster than PCI but slower than PCIe (PCI Express) video cards. D 53. The paper tray \bigcirc D. Tell the customer that an adult must be home while you work. WAP \bigcirc C. 64. A dual-core processor uses higher voltage than a single-core processor uses higher voltage than a single-core processor. This address will be on the 169.254.0.0 network. The computer is not usable in other countries. 172.31.1.1 \bigcirc D. 165 Practice Questions . (Select the two best answers.) O Quick Answer: 63 Detailed Answer: 63 Detailed Answer: 76 A. Although not used as often as a Phillips screwdriver, this tool is sometimes used to remove screws from the outside of a computer case or from within a laptop. A switch interconnects one or more networks, whereas a router interconnect devices on a network. Technicians must be security-minded.
